Equity Chart

The following chart demonstrates the equity growth over time, highlighting the strategy's performance during the backtesting period.

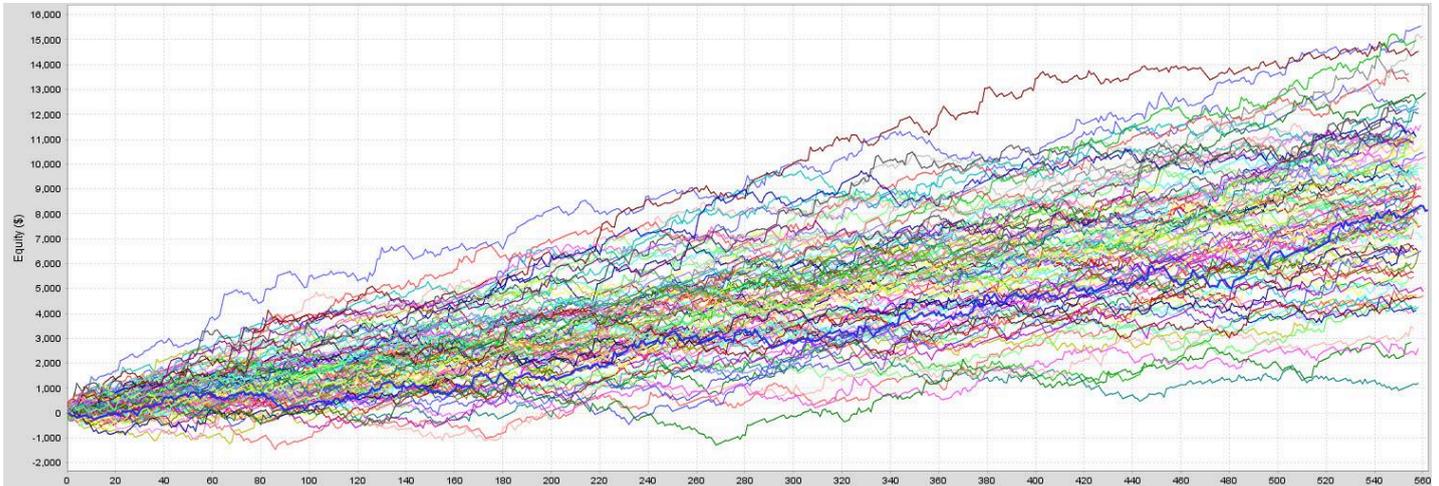

Comprehensive Trade Analysis

This section summarizes key performance metrics such as win rate, profit factor, and maximum drawdown, ensuring the strategy's effectiveness.

Monte Carlo Simulation

To ensure the robustness and reliability of this trading strategy, a Monte Carlo simulation was conducted. This method involves running numerous randomized simulations to account for variability in market conditions, trade sequences, and potential slippage. The simulation confirms consistent profitability across randomized scenarios, reinforcing the strategy's resilience.

Detailed Strategy Operation

1. This EA is designed for **GBPJPY** and combines **Moving Averages**, **Bollinger Bands**, and **RSI**, plus your required **custom indicator(s)**, to help define conditions for entries and filtering. Money management defaults are **1.0% risk per trade**, **5.0 lot cap**, and **0.10 fixed-lot fallback** if risk sizing is disabled. It includes protective trade handling and will **block new trades** after the expiry date, showing the update prompt on the chart.

Overall Result - PASS*

This report confirms that this strategy has passed the rigorous validation process and meets the high standards set by Guardian FX Engine Pro.
